

INDEX TO VOLUME XXXIII

- ADAMS, H. S.** See TASHIRO and ADAMS, xxxviii.
 Adrenals, related to emotions, 356.
 Appetite, contrast with hunger, xv.
- BECHT, F. C.** Observations on the formation of cerebrospinal fluid, xxxii.
- BIGELOW, G. H.** See MARTIN, BIGELOW, and WILBUR, 415.
- Blood, coagulation rate, xxviii.
 —, dialysis, xii.
 —, disappearance of dextrose from, xvii, 378.
 —, in hemophilia, xiii.
 —, pressure, a factor in fatigue, 335.
 —, sugar in, x, 378.
- Blood pressure, curve in pulmonary artery, i.
 —, —, curves, pulmonary, xi.
 —, —, percentile reckoning of, xxxvi.
 —, —, reflex fall of, xxxvii.
 —, —, venous, determination in man, xxvii.
- Brain, relation of cortex to mental power, xxxv.
- BRINKMAN, W. F.** See CARLSON, ORR, and BRINKMAN, 86.
- BRYANT, W. S.** An experiment to prove that the cilia of the human nose waft toward the anterior nares, 430.
- BURGE, W. E.** The rôle of nascent oxygen in protecting the body from self-digestion, xxvi.
- CALORIMETRY**, xvi.
 CANNON, W. B., and W. L. MENDENHALL. Some physiological factors affecting the speed of coagulation of the blood, xxxviii.
- CANNON, W. B.** The emergency function of the adrenal medulla in pain and the major emotions, 356.
- CARLSON, A. J.** A method of obtaining successive contrast of the sensations of hunger and appetite, xv.
 —. Contributions to the physiology of the stomach: VIII. Hunger contractions of the empty stomach during prolonged starvation (Man, Dog), 95.
- CARLSON, A. J.** On the cause of congenital goitre (thyroid hyperplasia) in dogs and cats, 143.
 —, and A. B. LUCKHARDT. Contributions to the physiology of the stomach: X. The condition of the oesophagus during the periods of gastric hunger contractions, 126.
 —, J. S. ORR, and W. F. BRINKMAN. On the secretion of gastric juice in the cat, 86.
 —, J. S. ORR, and L. W. McGRATH. Contributions to the physiology of the stomach: IX. The hunger contractions of the stomach pouch isolated according to the method of Pawlow, 119.
- Cerebrospinal fluid, formation of, xxxii.
- Cilia, human, 430.
- Creatine, elimination affected by caffeine, 186.
- Creatinine, elimination affected by caffeine, 186.
- DEPRESSOR NERVE**, reflex threshold, xxxvii.
- Dextrose, disappearance from blood, xvii.
- Diabetes, polyphagia in, 313.
- Digestion, self, protection by nascent oxygen, xxvi.
- DRESBACH, M.** An improved form of apparatus for perfusion of the excised mammalian heart, xxiii.
- DuBois, E. F.** A summary of work accomplished with a respiration calorimeter in Bellevue Hospital, xvi.
- EDWARDS, D. J.** A study of the anatomy and the vasomotor phenomena of the sympathetic nervous system in the turtle, 229.
- Emotions, relation to adrenal medulla, 356.
- ERLANGER, J., and W. E. GARREY.** Faradic stimuli: a physical and physiological study, xiv.
- ERLANGER, J.** See GESELL and ERLANGER, xxxiii.
- EWING, E. M.** See JACKSON and EWING, xxx.

- EWING, E. M. The venous pulse, 158.
- EYSTER, J. A. E. See MEEK and EYSTER, xxviii.
- F**ATIGUE, affected by adrenal in and by arterial pressure, 335.
- Fibrinogen, origin and destruction, 50.
- , regeneration, 70.
- Filtration, affected by pulsation, xxv.
- G**ARREY, W. E. See ERLANGER and GARREY, xiv.
- GARREY, W. E. The nature of fibrillary contraction of the heart. Its relation to tissue mass and form, 397.
- GASSER, H. S., and W. J. MEEK. The acceleration of the heart in exercise, xx.
- GASSER, H. S. See PETERSEN and GASSER, 301.
- GATES, F. L., and S. J. MELTZER. Some mutual relations of oxalates, salts of magnesium and calcium; their concurrent and antagonistic actions, xxi.
- GESELL, R. A. The effect of pulsation on filtration, xxv.
- and J. ERLANGER. Device for interrupting a continuous blast of air, designed especially for artificial respiration, xxxiii.
- Goitre, congenital, 143.
- GOODPASTURE, E. W. Fibrinogen: II. Association of liver and intestine in rapid regeneration of fibrinogen, 70.
- GREER, J. R. See MURLIN and GREER, 253.
- Growth, xxviii.
- GRUBER, C. M. Studies in fatigue: III. The fatigue threshold as affected by adrenalin and by increased arterial pressure, 335.
- H**EART, action related to respiratory metabolism, 253.
- , affected by products of muscular activity, 301.
- , discharge from ventricles, xviii.
- , effective pressure in auricles, 13.
- , effect of exercise, xx.
- , fibrillary contraction of, 397.
- , intraventricular pressure curve, xi, 382.
- , pace-maker in, xxviii.
- , perfusion apparatus, xxiii.
- , reflex inhibition, xxx.
- HENDERSON, Y., and A. L. PRINCE. The relative systolic discharges of the right and left ventricles and their bearing on pulmonary depletion and congestion, xviii.
- HESS, C. L., and H. MCGUIGAN. The dialysis of the normal circulating blood, xii.
- HOOKE, D. R. Convenient modification for venous pressure determinations in man, xxvii.
- , and S. O. REESE. Saline perfusion of the spinal centres in frogs: the effect of calcium and potassium chloride, xxvii.
- HOWELL, W. H. The condition of the blood in hemophilia, xiii.
- Hunger, contractions of stomach pouch, 119.
- , contrast with appetite, xv.
- , effect of age, 423.
- , oesophagus in, 126.
- , stomach contractions in, 95.
- J**ACKSON, H. C., and E. M. EWING. Immediate and subsequent effects of anaesthesia, low blood pressure, and handling of the intestines upon reflex cardio-inhibition, xxx.
- K**EETON, R. W. The secretion of the gastric juice during parathyroid tetany, 25.
- Kidney, urine flow affects secretion of uric acid, 324.
- KLEINER, I. S., and S. J. MELTZER. On the rapid disappearance from the blood of large quantities of dextrose injected intravenously, xvii.
- KRAMER, B. See MURLIN and KRAMER, xxxii.
- L**ACEY, W. H. See MARTIN and LACEY, 212.
- LEE, F. S. Some chemical features of the diaphragm and other skeletal muscles, xxiv.
- LUCKHARDT, A. B. Contributions to the physiology of the stomach; XI. The cause of the polyphagia in pancreatic diabetes, 313.
- , See CARLSON and LUCKHARDT, 126.
- Lung, circulation in, xviii.
- M**CGRATH, L. W. See CARLSON, ORR, and MCGRATH, 119.
- MCGUIGAN, H. See v. HESS and MCGUIGAN, xii. *

- MACLEOD, J. J. R., and R. G. PEARCE. Further observations on the rate at which sugar disappears from the blood of eviscerated animals, 378.
- Manometer, xi.
- MARTIN, E. G., G. H. BIGELOW, and G. B. WILBUR. Variations in the sensory threshold for faradic stimulation in normal human subjects; II. The nocturnal variation, 415.
- MARTIN, E. G., and W. H. LACEY. Vasomotor reflexes from threshold stimulation, 212.
- MARTIN, E. G., and P. G. STILES. Two types of reflex reduction of blood pressure, xxxvi.
- MEEK, W. J., and J. A. E. EYSTER. The effect of vagal stimulation on the location of the pace-maker in the mammalian heart, xxviii.
- MEEK, W. J. *See* GASSER and MEEK, xx.
- MEIGS, E. B. The osmotic properties of clam's muscle, xxii.
- MELLUS, E. L. Evidences in the cerebral cortex of mental equipment and intellectual development, xxxv.
- MELTZER, S. J. *See* GATES and MELTZER, xxi.
- *See* KLEINER and MELTZER, xvii.
- MENDEL, L. B. *See* OSBORNE and MENDEL, xxviii.
- MENDENHALL, W. L. *See* CANNON and MENDENHALL, xxxviii.
- Metabolism, in depancreatized dogs, xxxii.
- , respiratory, related to heart action, 253.
- MURLIN, J. R., and B. KRAMER. Further observations on the metabolism of depancreatized dogs, xxxii.
- MURLIN, J. R., and J. R. GREER. The relation of heart action to the respiratory metabolism, 253.
- Muscle, chemistry of, xxiv.
- , osmotic properties, xxii.
- , products affect heart, 301.
- NERVE, carbon dioxide production in, xxxviii.
- , metabolism in, xxxvii.
- NICE, L. B. Thresholds for faradic stimulation of the respiratory reflex and of the phrenic diaphragm preparation, 204.
- OSOPHAGUS, in hunger, 126.
- ORR, J. S. *See* CARLSON, ORR, and BRINKMAN, 86.
- *See* CARLSON, ORR, and McGRATH, 119.
- OSBORNE, T. B., and L. B. MENDEL. Some problems of growth, xxviii.
- PAIN, action of adrenal medulla in, 356.
- Pancreas, relation to metabolism, xxxiii.
- Parathyroid tetany, gastric juice in, 25.
- , influence on liver and pancreas, 283.
- PATTERSON, T. L. Contributions to the physiology of the stomach; XIII. The variations in the hunger contractions of the empty stomach with age, 423.
- PEARCE, R. G. *See* MACLEOD and PEARCE, 378.
- PETERSEN, M. S., and H. S. GASSER. The effect of chemical products of muscular activity on the frequency and force of the heart beat, 301.
- Polyphagia, in diabetes, 313.
- PORTER, E. L. The effect of strychnin on reflex thresholds, xix.
- PORTER, W. T. On the percentile measurement of the vasomotor reflexes, 373.
- , and J. H. PRATT. The state of the vasomotor centre in diphtheria intoxication, 431.
- PRATT, J. H. *See* PORTER and PRATT, 431.
- PRINCE, A. L. *See* HENDERSON and PRINCE, xviii.
- Proceedings of the American Physiological Society, xi.
- Pulsation, affects filtration, xxv.
- Pulse, venous, 158.
- REESE, S. O. *See* HOOKER and REESE, xxvii.
- Reflex thresholds, affected by strychnin, xix.
- , in faradic stimulation, 204.
- Respiration, apparatus, xxxiii.
- Respiration, relation to heart action, 253.
- RIEGER, J. B. *See* SALANT and RIEGER, 186.
- ROBERTSON, J. H. The influence of the rate of urine flow on the secretion of uric acid, 324.
- SALANT, W., and J. B. RIEGER. The influence of caffeine on the elimination of creatine and creatinine, 186.
- Salts, magnesium, calcium, and oxalates; their mutual relations, xxi.

Spinal cord, perfused with calcium and potassium chloride, xxvii.

STILES, P. G. *See* MARTIN and STILES, xxxvi.

Stimulation, faradic, reflex thresholds, 204.

Stimuli, faradic, xiv, 415.

STOLAND, O. O. The influence of parathyroid tetany on the liver and the pancreas, 283.

Stomach, during hunger, 95, 119, 126, 423.

—, gastric juice, secretion in cat, 86.

—, gastric juice in parathyroid tetany, 25.

Strychnin, action on reflex thresholds, xix.

Sugar, in blood, x, 378.

Sympathetic system, in turtle, 229.

TASHIRO, S. The metabolic gradient in the nerve fibre, xxxvii.

— and H. S. ADAMS. The action of anaesthetics on carbon dioxide production in the nerve fibre, xxxviii.

URIC ACID, effect of urine flow, 324.

VAGUS, action on heart, xxviii.

Vasomotor centre, in diphtheria, 431.

— phenomena in turtle, 229.

— reflexes, percentile measurement, 373.

— reflexes, threshold stimulation, 212.

WHIPPLE, G. H. Fibrinogen: I. An investigation concerning its origin and destruction in the body, 50.

WIGGERS, C. J. Observations on the "effective" pressure in the right and left auricles, 13.

— Some factors controlling the shape of the pressure curve in the right ventricle, 382.

— The contour of the intraventricular and the pulmonary arterial pressure curves by two new optically recording manometers, xi.

— The contour of the pressure curve in the pulmonary artery, 1.

WILBUR, G. B. *See* MARTIN, BIGELOW and WILBUR, 415.

VOL. XXXIII—No. III

Issued March 2, 1914

BOSTON, U. S. A.

1914

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. The price of one volume, sent postage free to subscribers in the United States and Canada, is five dollars and fifty cents; to subscribers in other countries, five dollars and seventy-five cents. The price of Volumes One, Two, and Three will be six dollars to domestic subscribers, and six dollars and twenty-five cents to foreign subscribers. All subscriptions are payable in advance.

The price of the Index of Authors and of Subjects in the first thirty volumes is four dollars, payable in advance.

Subscriptions, manuscript, and all other communications should be sent to THE AMERICAN JOURNAL OF PHYSIOLOGY, Box 127, Back Bay P. O. Boston, Mass., U.S.A.

Copyright, 1914, by THE PLIMPTON PRESS

Printed at THE PLIMPTON PRESS, Norwood, Mass., U.S.A.

Entered at the Boston, Mass., Post Office, as second-class matter, Feb. 11, 1903.
